Japan's focus for Agriculture/Food Security under TICAD V

Contribute to 6% agriculture growth rate & Strengthening the foundation for food security

Doubling rice production in10 years(14 million ton→28millin ton)

CARD

 Produce rice for 200 million people (20% of the population in Subsahara-Africa) Expand the models to total 10 countries

SHEP approach (livelihood Improvement for small farmers).

Produce in order for selling

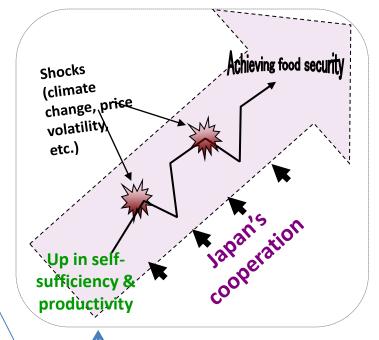

Prosavana approach
(+Infrastructure development)

Win-Win for small farmers and private institution, through promoting investment

Farming as business

Productivity

+ Partnership with private institutions/Value chain

- Japan takes "productivity" as major pillar, with emphasizing the viewpoints of "Partnership with private institution" and "value chain"
- However, agriculture in Africa occasionally shocked by the natural disasters such as drought. To alleviate the damage, it is crucial to strengthening the resilience of agriculture and rural community.
