

# PRESENTATION OF NATIONAL STRATEGY FOR RICE DEVELOPMENT IN BURKINA FASO

**Présentation: Mr Youssouf OUATTRARA**

**Point focal Task force**

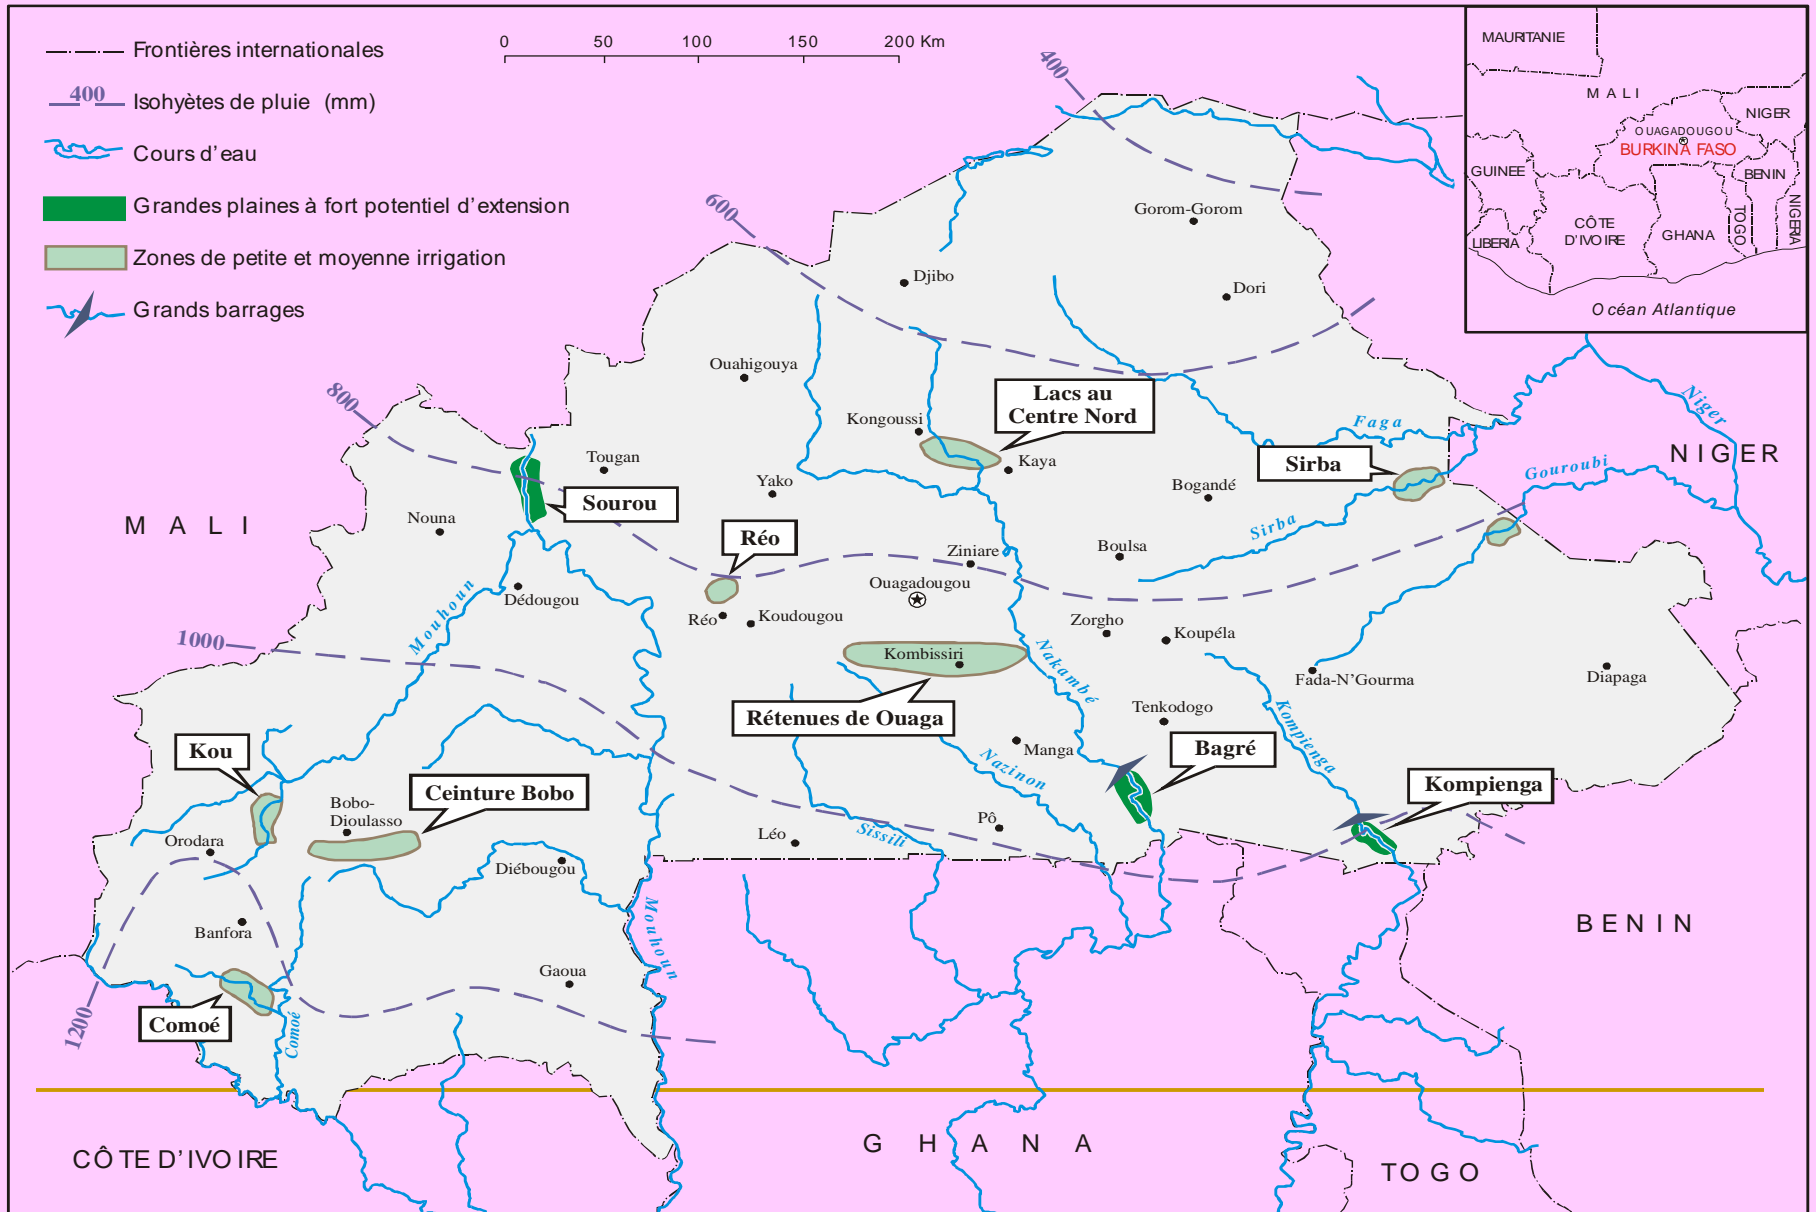

# Background-Basic facts

- ✓ Burkina Faso is a West African country;
- ✓ Total area=274,200 km<sup>2</sup> ;
- ✓ Population (2009)=15.74 million, Population growth rate= 3%;
- ✓ GDP (2008): 7.28 Billion US\$,
- ✓ GDP Per capita (2008): 480 US\$;
- ✓ Agriculture represents 33% of its GDP and occupies 85% of the working population;
- ✓ Self-sufficiency ratio of rice is 30%;
- ✓ Import value of rice (2007): 60 Million US\$.

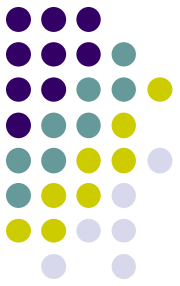

# Background-Related Policies

- In 2004, BF worked out its RDS in accordance with the CSLP one of whose strategic main lines is to increase, diversify and intensify the agricultural productions;
- Rice growing is one of the priority fields to achieve food security in BF;
- Since 2007, BF has been granting subsidies to the rice producers on their inputs and support for capacity building of rice producers organisation;
- PNIA/PROSDRSP in finalisation stage defined the objectives of CAADP in BF regarding rice growing as a food security and earning sector ;

# Rice Production Map (irrigated)

# Priority agro-ecologies

- ❖ 3 rice growing ways are carried in BF:
  - Irrigated, low land and rain fed;
- ❖ The 3 rice growing ways have priority for production growth;

Year	Rain fed rice growing			Low land rice growing			Irrigated rice growing* (plots twice exploited/year)				TOTAL	
	Sup (Ha)	Yield (Ha)	Prod (T)	Sup (Ha)	Yield (T/Ha)	Prod (T)	Sup (Ha)	Yield (T/Ha)	Coef	Prod (T)	Sup (Ha)	Prod (T)
2008	12000	1.10	13200	47000	2.5	117500	12500	5.5	1.52	104500	71500	216883
2018	35000	2.5	87500	110000	4	440000	30000	7	1.81	380000	175000	787500

# Priority sub-sector

Achieving the 4 main lines of the NSRD involves the priority will be granted to:

- Increase of the exploited areas and a better management of water resources;
- Promotion and improvement of the use of the improved seeds, fertilizers and pesticides;
- Mechanization of rice growing (from ploughing to post harvest);
- Improvement of the quality of local rice by adequate equipments for post harvest treatments ;
- Promotion of the access of local rice to the national and sub-regional market;
- Promotion of the access of the actors to the credits;
- Reinforcement of the operational capacities of the actors of rice sector;
- Research and dissemination of innovating technologies of rice production;

# List of development partners for rice-related intervention

N°	Name of project	Fields of support	Partners and Funds sources	Duration	
				Start	End
1	Agricultural intensification Program through Water Control in Center-South and Center-West Regions (PIAME/CSCO)	Production, Extension § training	Spain and BF	2007	2010
2	GCP/BKF/052/EC	Seed and Policy	EU	2007	2011
3	PADER-GK	Production, Extension § training, Irrigation	BAD and BF	2007	2011
4	Rainfed Rice Project	Production, Extension § training, Irrigation, Marketing, Post harvest, Lowland development	Taiwan	2009	2013
5	Agriculture and rural area Development through innovative System of Production Based on Rice	Production, Extension § training, Seed	Japan/FAO	2009	2010
6	Strengthening of regional capacity for the development of community lowlands and irrigate plots	Production, Extension § training, Lowland development	Japan/PAM	2005	2011
7	Development Project for Agricultural Mechanization and support to the hydraulic sector	Mechanization	Indian	2007	2011
8	Integrated Development Program of Samendeni Valley	Hydro agricultural Land development, irrigation,	BID, BADEA, FABD, BOAD, OPEP, FSD, FKDEA, BF	2007	2012
9	PDHA SOUM	Extension § training, irrigation	BID , BOAD, BF	2009	2013
10	PABSO	Production, Extension § training, Low-land development, Credit	KFW	2009	2012
12	PAHA-DANGOUMANA	Irrigation	BID and BF	2009	2014
13	Agriculture Productivity and food security project	Production, Extension § training, Low-land development, Credit, Marketing	IDA and BF	2009	2015
