CN#1: Information Sheet of New Marshland Development

| 1. Project Title | Reclamation of marshlands for sustainable rice production in Rwanda | | | | | | | | |
|--|--|---|---|---|---|---|--|--|--|
| 2. Location | A total of 3,016 Ha which includes 646 Ha in Budubi (Nyanza/ Muyira & Busoro & Kigoma), 1,340 Ha in Agatobwe (Nyaruguru /Rusenge & Ngera & Ngoma, & Karama(Huye)), 530 Ha in Muhanga (Muhanga), 500 Ha in Bugarama downstream (Rusizi); where prefeasibility studies are already conducted | | | | | | | | |
| 3. Type of Project (multiple selection) | 1 | 2 | 3 | 4 | 5 | | | | |
| | 1. Grant, 2. Loan, 3. Technical Coop./Assistance, 4. National budget, 5. Private sector | | | | | | | | |
| 4. Fields covered (multiple selection) | 7 | 3 | 4 | 8 | 9 | 5 | | | |
| | 1. Policy, 2. R & D, 3. Extension & Training, 4. Production, 5. Marketing 6. Post-harvest, 7. Irrigation, 8. Credit, 9. Seed, 10. Other (specify above) | | | | | | | | |
| 5. Suggested Fund source | GoR, WB, IFAD, AfDB, JICA | | | | | | | | |
| 6. Budget / Cost | 15,000 USD/Ha x 3,016 Ha = 45,240,000 USD | | | | | | | | |
| 7. Project duration | 5 years | | | | | | | | |
| 8. Target beneficiaries | Direct | Farmers, Rural communities in the neighborhood of marshlands | | | | | | | |
| | Indirect/ Secondary | Unput suppliers, Traders, Millers, Consumers | | | | | | | |
| 9. Overall objective (Goal) | To increase domestic rice production in Rwanda | | | | | | | | |
| 10. Project objectives | Specific Obj: | To expand area under rice cultivation through development of new marshlands | | | | | | | |
| 11. Expected results/Proje cts outputs | R1. | Sustainability levels of rice farming in the identified marshlands established | | | | | | | |
| | R2. | The required infrastructures for rice cultivation in the identified marshlands put in place | | | | | | | |
| | R3. | Plots for rice cultivation are leased to farming community | | | | | | | |
| | R4. | Knowledge on rice cultivation is enriched amongst the farming community | | | | | | | |

| | R5. | Farmers in the new marshlands are able to access the markets for inputs and outputs more readily | | | | |
|--|---|--|--|--|--|--|
| 12. Components and Activities | Component 1 : Feasibility Studies | | | | | |
| | A1.1. | Bid tender for conducting feasibility studies on sustainable rice farm in the identified marshlands | | | | |
| | A1.2. | Assess the socio-economic, environmental, soil and hydrological aspects of the sustainability in the marshlands | | | | |
| | Component 2 : Civil Works | | | | | |
| | A2.1. | Chart a detailed design for reclamation of the marshlands in which feasibility is established | | | | |
| | A2.2. | Construct catchment areas, irrigation network and land-levelling in the marshlands | | | | |
| | Component 3: Mobilization of farmers around the marshlands | | | | | |
| | A3.1. | Conduct legal allotment of plots in the marshlands in consultation with the local communities and local administration | | | | |
| | A3.2. | Organize training on rice production for farmers, cooperative management and extension agents | | | | |
| | Component 4 : Development of the rice value chain in the reclaimed marshlands | | | | | |
| | A4.1. | Establish linkages between private suppliers of inputs (seeds, fertilizers, agro-chemicals and finance) and farmers and cooperatives | | | | |
| | A4.2. | Establish linkages between farmers/cooperatives and private marketing enterprises (traders/millers) | | | | |
