Research Officer at SP/CPSA
Ministry of Agriculture, Animal and Fisheries
Resources

Overall indicators

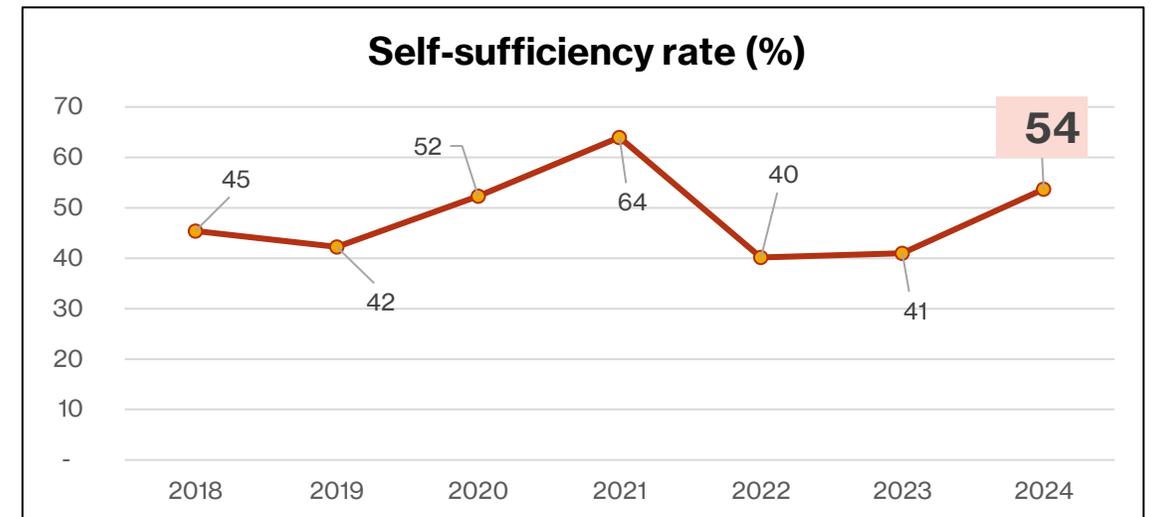

Source: DGESS/MARAH

	Target for 2030
Production	3,000,000 tonnes of paddy rice
Area	627,578 ha
Yield	4.78 tonnes/hectare
Self-sufficiency rate	120%

Progress of CARD activities since AG9

Progress on NRDS II development processes

Activities and Progress

Development phase

- 1. Formulation of NRDS II (2021-2030):** 2019; partners: JICA, GIZ and CARD
- 2. Validation & launch of NRDS II:** 28 January 2020; involvement of stakeholders in the rice sector
- 3. Development of Concept Notes (CN):** early 2021 by the TASK FORCE
- 4. Fund mobilisation:** 713,526,671,864 CFA francs, or \$1,274,154,771, mobilised over the period 2020-2024. This amount consists of \$694,999,859 for lowlands and \$579,154,913 for irrigated areas (PI).

For the next five years, the forecasts are as follows:

- State budget: \$17,921,147 for rehabilitation and \$50,179,211 for the development of new IPs
- MDB: \$22,580,645 for rehabilitation and \$32,315,412 for the development of new IPs

Progress on the M&E phase of NRDS II

Activities and Progress

Monitoring phase

- 5. Setting monitoring data:** Existence of M&E system; development of baseline and procedure manual in March 2023: Support from JICA and CARD
- 6. Preparation of the Annual Review of the Rice Sector (ARSRM):** currently being prepared with support from GIZ through the MOVE project
- 7. Mobilisation of funds for monitoring:** Budget line currently being registered with the SP/CPSA, ONARiz-BF and PTFs (GIZ)

Implementation of the NRDS and lessons learned

Presentation of the main projects launched since GM9

Partner	Period	Project name	Amount		
State, AfDB	2023-2025	Emergency Project to Strengthen Agricultural Production in Burkina Faso (PURPA-BF)	25.523	Billion	CFA francs
State, AFD, KFW	2023	Small-scale irrigation project in the Far West and East regions	36.20	Billion	CFA francs

Good example and Challenge in terms of implementing the NRDS

<Challenges>

- Low level of intensification and modernisation of production systems (poor access to water for production, quality inputs, technological innovations, mechanisation, processing units, etc.).
- Poor interconnection between stakeholders (lack of a digital platform for networking stakeholders for rice marketing)
- Low involvement of the private sector;
- Low mobilisation of financial resources for the SNDR II monitoring and evaluation mechanism

<Good examples>

- **Strong involvement of the State** (increase in public resources for the development and enhancement of irrigated areas)
- Restructuring of external financing projects and programmes based on the sector's development priorities;
- Setting of an intermediate target (1 million tonnes to be achieved in the short term)
- Establishment of the Burkina National Rice Observatory
- Implementation of a strategy to attract more private investment (approach to transfer management of developments to the private sector, supported by AGRA)

Action plans between now and the end of 2026

Action 1: Continue to intensify rice production

1. Increase rice production areas in lowlands and irrigated areas with total water control (state budget, AGRA and other partners);
2. Increase national production capacity for pre-basic and basic seeds in collaboration with AfricaRice
3. Strengthen the technical and operational capacities of stakeholders;
4. Continue to inform/raise awareness and mobilise stakeholders and funding around SNDR II.

Action 2: Improve private sector involvement in the sector

1. Continue the process of mobilising and establishing the private sector in rice production (State and AGRA);
2. Ensure the functionality of the National Rice Observatory of Burkina Faso;

Action 3: Organise the first review of the rice sector

1. Assess the implementation of NRDS II
2. Assess the implementation of the Concept Notes
3. Analyse the new gaps to be filled in order to achieve the short-, medium- and long-term objectives
4. Organise a meeting with partners to finance the identified gaps
